MNA
Group
Limited

MNA Group (East Yorkshire) Limited

Founded in 2008, the company began as a health and safety consultancy focused on ensuring workplace safety standards. Over time, it has broadened its expertise to offer a comprehensive suite of services tailored for various industries.

Currently, our offerings include specialised areas such as Height Safety Solutions, Building and Construction Services, Health and Safety Consultancy and Roofing and Cladding solutions. Each service is fronted by our team who are experts in their fields in order to address the specific challenges faced by clients in their respective sectors.

Our remarkable growth can be attributed to an unwavering commitment to quality and exceptional client satisfaction. This success has inspired the establishment of two subsidiary companies—MNA Cladding & MNA Support Services—and facilitated the acquisition of a second regional office in Bradford. This expanded presence enhances our ability to engage closely with clients across the region.

We prioritise hiring local talent and sourcing materials from nearby suppliers whenever possible, reinforcing community ties while delivering quality services.

Contents

- Fire Safety Solutions

- Commercial Fit-out & Refurbishment
- Commercial Drainage
- Electrical Services
- Joinery & Bespoke Carpentry
- Groundwork Services
- Liquid Waterproofing Systems
- Roof Maintenance Services
- Facilities Maintenance & Reactive Services
- Eco Sol Sustainable Energy Solutions

Fire Risk Consultancy

The safety of you and your employees is paramount to business continuity and ensuring your business complies with current safety legislation. We work with businesses to equip them with the relevant skills, expertise and competence to implement safe systems of work and operate safely.

Fire Risk Assessments

The fire risk assessment is a five step process that should:

- 1) Identify the hazard
- 2) Consider who may be at risk
- 3) Evaluate the risk, eliminate or reduce the risk from fire as far as is reasonably possible and provide general fire precautions to deal with any possible risk
- 4) Create a plan to deal with any emergency, keep a record of your findings and train staff what to do in the event of an emergency
- 5) Review your findings when necessary

Fire Safety Solutions

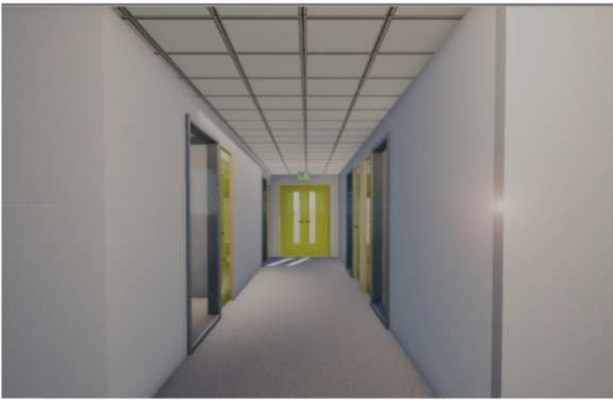

MNA offer a professional, expert, fire safety solutions to all clients on nationwide scale. With a quality assurance core we aim to provide the framework to keep businesses and communities safe.

Fire Door Inspections

Maintenance of fire doors and recording of its ongoing assessment forms part of the premises fire risk assessment, and is a duty of the responsible person. Our Fire Door Inspectors are competent and certified to undertake all types of fire door inspections and certifications.

Upon completion of the assessment a detailed report, outlining the condition of the door and highlighting any remedial work will be issued. These are important records that should be maintained with the premise log book.

MNA work in a close relationship bringing the designs of the architects, structural engineers, service engineers and specialist designers together with the aim of producing a coordinated project, ensuring that design information is of the right quality and keeps pace with the project's timescales at all times.

Design & Build

Our Ethos..

It is our Design Management strategy to ensure that effective project delivery commences at the design stage.

We ensure all consultants; site management and client expectations are brought together to create a team ethos which has proved to be the benchmark for previous successful projects.

We deliver...

- Complete beginning-to-end interior services.
- Imaginative & practical spaces that are exceptionally crafted.
- High quality, cost effective interior design and fit.
- Work to your schedule, budget and style.
- Environments that meets and exceeds your expectations
- Manage everything from office refits right through to complete rebuilds.

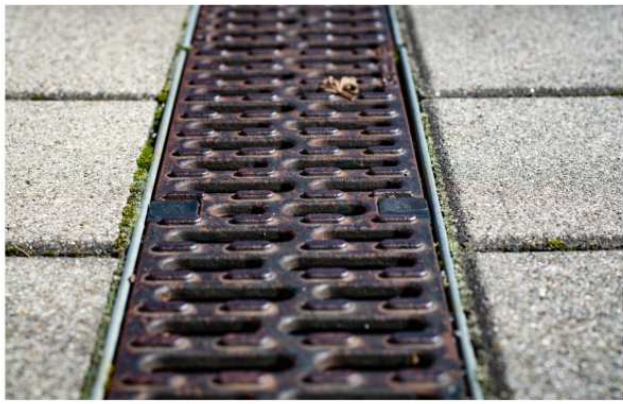

Commercial Fit-Out & Refurbishment

MNA offers complete commercial interior design services for Residential, Workplace and Hospitality. Our specialist division has extensive experience working on small and large projects with many blue-chip clients to create interiors that are emotive, inspiring and most importantly, that convey your brand.

Detail makes the design..

We appreciate how important business continuity is to every business, so we work with you every step of the way. From the initial concept, through the fit out, to the finished product, including (if requested) supplying the interior designs and furniture. We take care of every aspect of the project's delivery.

Services

- Time critical work such as drain unblocking and emergency repairs & replacement
- CCTV Drain Surveys and investigation work to analyse the situations of drainage systems on industrial and commercial sites (Including comprehensive reports and recommendations for improving and maintaining services)
- Maintenance and reinstatement work to keep your business operational and reduce likelihood of emergency requirements
- New drainage and sewer system installations
- Pump station maintenance
- All our services are available 24/7/365

Commercial & Industrial Drainage Services

MNA Drainage Division provides drainage services to a variety of commercial and industrial clients nationwide.

A person wearing a red jacket and black gloves is holding a tablet computer. The tablet screen displays a close-up image of a drain opening, showing a rusty metal grate and some debris. The background is slightly blurred, showing a paved area and some equipment.

Our commercial clients range from large Blue Chip Organisations, Facilities & Property Management Companies, NHS, Public Housing Associations, Local Authorities, Water Companies, Supermarket Chains, Charitable Organisations, Structural Engineers & Surveyors.

Electrical Services

Our Services include:

- Lighting Systems
- Lighting Control Systems
- Mains Power Systems
- Small Power Distribution
- Controlled Entry Systems
- Fire Alarm Systems
- Emergency Lighting
- Security Alarm Systems
- CCTV Installation
- Cable Management Systems
- Electrical Maintenance Services

MNA provides a complete electrical solution employing teams of highly experienced and qualified engineers. We also offer 24/7/365 emergency call out services

MNA holds full accreditations across a wide range of commercial and domestic electrical services.

Bespoke joinery using hardwood, softwood and sheet materials such as laminates and veneers, can be combined with hard surface materials such as Solid surface materials including marble and granite or even metal or acrylic to produce one-off pieces of work.

Proactively seeking the best, most cost-effective solution we will use our technical experience to enhance, add value and where possible speed up the construction process.

Joinery & Bespoke Carpentry

MNA is a leading bespoke joinery manufacturer for commercial applications, providing full production, assembly and installation services that can also include onsite fabrication.

Our skilled craftsmen and modern onsite workshop mean we can accommodate all manner of single and project-based work.

Installation can be carried out by our own in-house team of joiners, as well as other in-house trades as required, providing a complete shop fitting and interior fit out service.

Services include:

- Ground Reinstatement
- Stoning Up
- Site Levelling
- Excavation
- Driveways and Footpaths
- Constructing Water Wells
- Concreting & Drainage
- Tarmacing
- Landscaping
- Drainage
- Site Preparations
- Site Clearance
- Demolition
- Foundations
- Paving, Flagging, Block Paving
- Drainage Installed & Replaced
- Breaking Out & Replacing Old Concrete Surfaces
- Yards In Stone, Tarmac® & Concrete

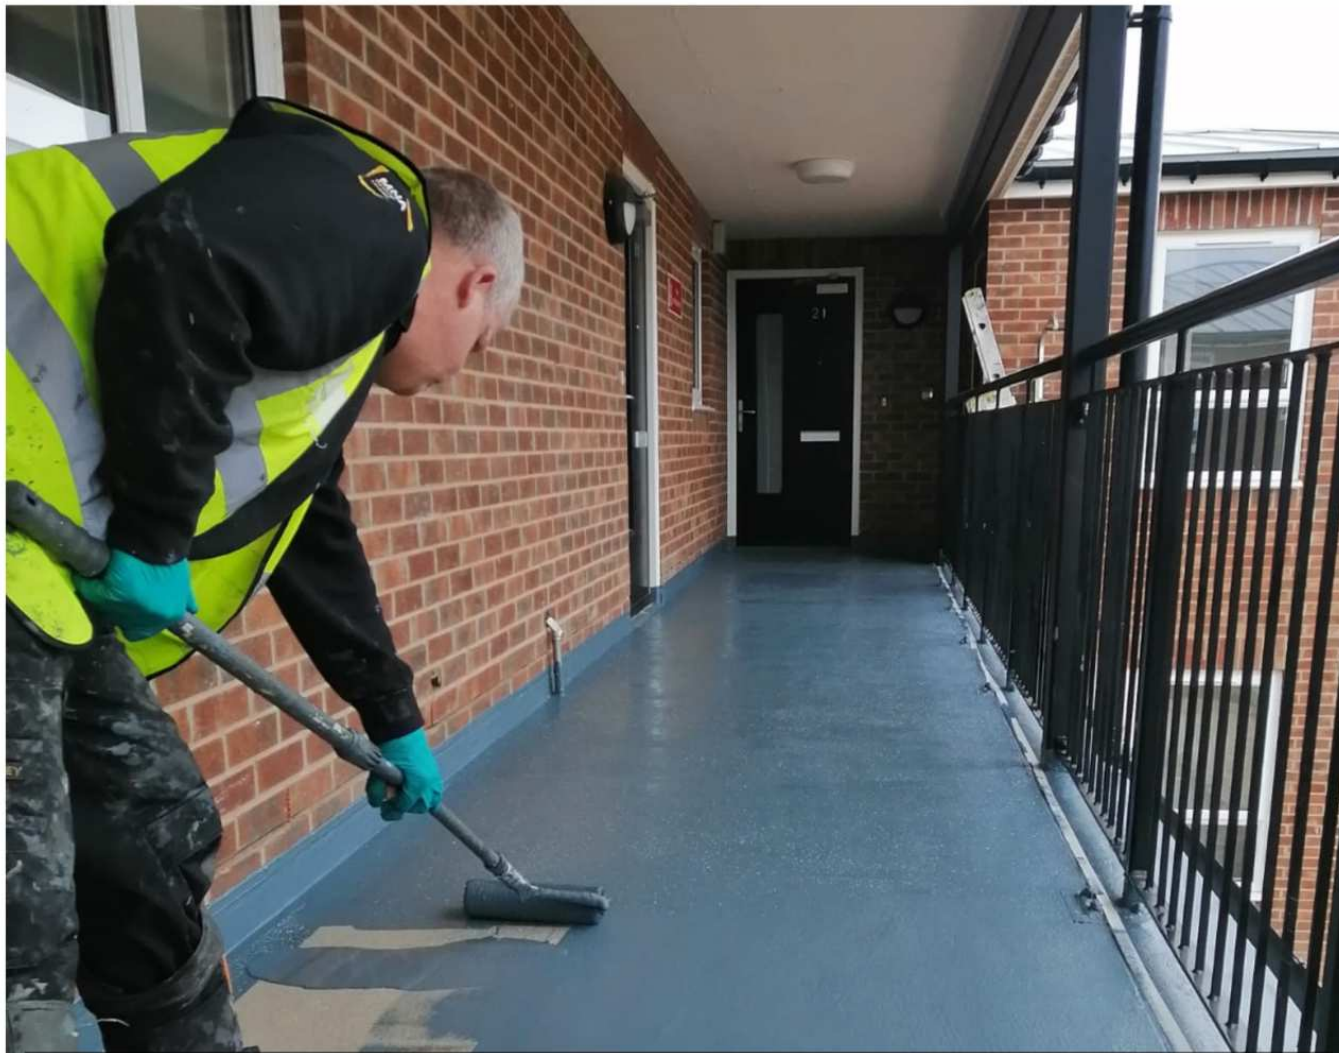

Groundwork Services

MNA groundwork services provide quality interior and exterior building work. Our teams can build, renovate and maintain brick, block and stonework including stone walls and the replacement of coping stones.

Our groundwork teams specialise in paving, tarmacing, thermoplastic line marking, Aco drains, slotted drains, soakaways and concreting, as well as the supply and installation of bollards and kerbing.

The landscaping team at MNA Group provide an excavation and landscaping service to ensure that the exterior looks as good as the interior.

Cold Applied Liquid Waterproofing

Cold applied systems, also known as liquid coatings, are predominantly used in the maintenance and repairs of flat surfaces including roofs, balconies and walkways, in addition these types of system can also be used where any item of plant penetrates the roof covering, or where items of the main structure interact with the main roof covering. Cold applied solutions are particularly relevant where different objects or shapes need to be weatherproofed, to maintain the integrity of the building.

Cold applied solutions are applied to surfaces in a liquid format which then cures to a fully weatherproof membrane, ensuring the elimination of water penetration through the structure.

Triflex

- The system is cold applied, which means no need for hot works and permits.
- Systems are rainproof just 30 minutes after application and cure in as little as 45 minutes.
- System installation can be carried out in any season, as it still cures rapidly even at temperatures down to -5C.
- The single application process means reduced installation costs in comparison to multi-coat solvent-based systems and eliminated risk of inter-layer adhesion issues.
- The system accommodates high levels of movement due to unique high flexibility resin and high tensile strength polyester fleece.
- The Triflex ProDetail system was the first liquid applied detail waterproofing system to be certified under ETAG 005 and was the first product of its type to be CE marked in Europe.
- The system is tough and durable, can withstand foot traffic and has remarkable puncture resistance.
- Systems can be installed to your aesthetic requirements with a range of colours and finishes available.
- Triflex systems can be used on the following substrates- felt, asphalt, bitumen, single-ply membranes, concrete, brickwork, masonry, non-coated and coated metals, glass, timber, and coatings such as polyurethane.

Roof Maintenance Services

Services include:

- Leak identification & identification
- Liquid Waterproofing
- Cut Edge Corrosion Repair
- Gutter upgrading, repairing & cleaning
- Outlet & Downpipe Clearance
- Upgrading of rainwater goods.
- Damage Repair
- Joint Waterproofing

We understand that problems can occur, no matter how well maintained a building is. Damage can happen through adverse weather or human error. Our teams are experienced, competent and can offer professional maintenance solutions to fit your budget.

Our Services:

- General Maintenance
- Internal & External Refurbishment
- Electrical Testing & Installs
- Painting & Decorating
- Plastering Works
- External Pressure Cleaning

Facilities Maintenance

We offer full building maintenance services to the retail, industrial, and commercial sectors, and have a competent and multi-skilled taskforce capable of performing all aspects of emergency, planned, and reactive maintenance.

From planned maintenance and refurbishment to emergency works and reactive maintenance we assist you in making sure your property is fit for purpose and safe.

When dealing with our clients' emergency and reactive maintenance needs, we make certain that they benefit from our dedicated appointed team, fully responsive service delivery and direct employed multi skilled workforce. We recognise and understand that you require a service that is turned and completed compliantly and within a strict timescale.

LED Lighting

Eco Sol provide a full range of LED lighting services to the highest standard. We work across all sectors including commercial, industrial, public, retail and residential.

No matter what your requirements are, we have the expertise to meet them. With over 20 years combined experience, our team have built solid relationships with many of the UK's most reputable suppliers such as Ansell, Osram & Philips enabling us to offer 5-year warranties across the board.

Eco Sol Sustainable Energy Solutions

Eco Sol is a new division for MNA . We are a Carbon Trust accredited supplier who offer multi-service renewable energy solutions with a particular focus on Charger Point Installation, Led Lighting, Solar Farms, Solar PV

Heat Pumps

Heat pumps are a great alternative to gas, they run on electricity and can be used to heat your building and water.

We currently use ECODAN systems developed by Mitsubishi. They work by simply converting the energy outside your building and heating water which is then pumped around your property to the radiators and hot water tank.

Solar PV

Solar PV is a system designed to capture the energy derived from sun rays and convert it to useable electricity that can then be used to power your property. As you know, sunlight is free, so once you have paid for the initial installation of your Solar PV system, your electricity bills will be significantly reduced.
