## **MNA Support Services Limited**

Founded in 2008, the company began as a health and safety consultancy focused on ensuring workplace safety standards. Over time, it has broadened its expertise to offer a comprehensive suite of services tailored for various industries.

Currently, our offerings include specialised areas such as Height Safety Solutions, Building and Construction Services, Health and Safety Consultancy and Roofing and Cladding solutions. Each service is fronted by our team who are experts in their fields in order to address the specific challenges faced by clients in their respective sectors.

Our remarkable growth can be attributed to an unwavering commitment to quality and exceptional client satisfaction. This success has inspired the establishment of two subsidiary companies—MNA Cladding & MNA Support Services—and facilitated the acquisition of a second regional office in Bradford. This expanded presence enhances our ability to engage closely with clients across the region.

We prioritise hiring local talent and sourcing materials from nearby suppliers whenever possible, reinforcing community ties while delivering quality services.
